

POLICY

Quality

Capefront Group conducts its activities and services based on an organizational structure and processes aimed at satisfying its clients and partners. Our system is built on monitoring performance and continuous improvement.

As a responsible company, Capefront is committed to addressing challenges related to:

- Climate change, marine environment protection, and energy transition,
- Energy independence and the protection of strategic dependencies,
- Emerging needs for skills and industrial expertise.

Key Directions of Our Policy:

- Ensure that current certifications are renewed and develop the QHSE system to comply with future certifications.
- Comply with all applicable national and international laws and regulations.
- In accordance with MLC 2006 convention.
- Align human and material resources with the needs of signed contracts and client orders.
- Communicate the objectives of this policy, as well as the results achieved relative to these objectives, to the entire organization and all interested parties.
- Ensure that all activities are safe for EMPLOYEES & SUBCONTRACTORS as well as for other parties directly or indirectly involved in the execution of the contractual service.
- Train all personnel on the requirements and responsibilities related to quality management.
- Ensure service compliance with the order and/or signed contract.
- Ensure that the service is delivered within the deadlines set by the CLIENT.
- Anticipate market needs.
